Giving USA Wednesday June 30, 2021

Philanthropic Consulting, LLC

## What 'Giving USA' Really Told Us:

Individual giving as a percentage of disposable income has been remarkably consistent; over the past 40 years; it has rarely strayed from a narrow range of 1.8 to 2.2 percent.

But according to the numbers in "Giving USA," **it fell to just 1.85 percent** in 2020. This is the **lowest it has been in nine years**; the last time it was lower was in 2011, when the charitable sector was just beginning to recover from the Great Recession of 2007-09.

What 'Giving USA' Really Told Us: Average Americans Are Giving a Smaller Share of Their Incomes to Charities (philanthropy.com) Chuck Collins Director Program on Inequality and the Common Good Institute for Policy Studies

### Average Americans Are Giving a Smaller Share of Their Incomes to Charities

A few tenths of a percent would seem to make a minor difference — but the dollar amount lost to charity is enormous. With disposable income in the United States currently at \$17.5 trillion, each tenth of a percentage point is equal to \$1.75 billion.

If individuals had given in 2020 at the same rate they did last year, at 1.94 percent, charities would have received \$339.22 billion — \$15 billion more than they actually did.

#### Quarterly Fundraising Report™

Year-to-Date Nonprofit Sector Trends 01/01/2020-12/31/2020

#### Highlights

Overall giving increased by 10.6% in 2020 as compared to 2019, spurred by an increase in new and reactivated donors. However, donor retention continued to decline in 2020, dropping 4.1%.

- Donations remain the highest in 5 years.
- Annual sum given by each donor increased during 2020.
- The number of new donors has increased, but retention is still an issue across the sector.

Donor Retention<sup>1</sup> (Year-to-date) 43.6%

Revenue and retention metrics report on year-to-date (YTD) performance compared against the prior year total based on a panel\* of organizations selected from the Growth in Giving Database of 176 million transactions from more than 20,000 organizations and **\$80 billion in donations** since 2005.

Year-to-date Fundraising Performance. All Rights Reserved.

#### Donors

Year-to-Date Nonprofit Sector Trends 01/01/2020-12/31/2020

#### Highlights

ISIONARY

New and recaptured donors represent additions to the total pool of supporters and both categories saw huge upswings in 2020.

New and repeat retained donors illustrate how many donors continue to give to the same organization. The decline in new retained donors was much larger than repeat retained.

Year-to-date response and retention metrics indicate how new single gift, existing, and elapsed donors are responding.

#### Retention

Year-to-Date Nonprofit Sector Trends 01/01/2020-12/31/2020

#### Highlights

Compared to the metrics on the prior page, these retention metrics are reporting on the changes in the percentages and not the number of donors in each category.

With fluctuations in the numbers of donors these retention metrics are illustrative of how effective we are at engaging our donors.

Year-to-date retention metrics indicate what percentage of existing and lapsed donors from previous years are giving again.

project

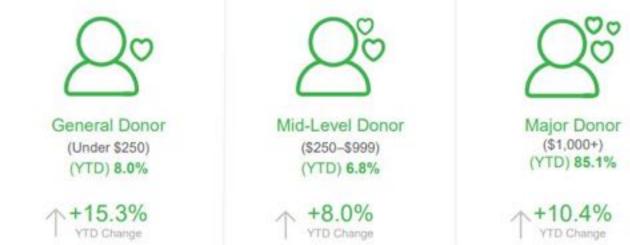

#### Donations

Year-to-Date Nonprofit Sector Trends 01/01/2020-12/31/2020

#### Highlights

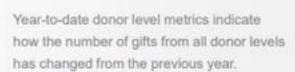

In the surge of giving sparked by the pandemic, donors at all levels were taking action and giving more in 2020.

While donors giving gifts of less than \$250 have seen the biggest increase over 2019, this growth had not been the largest driver of the overall lift in total dollars donated.

#### Fundraising Effectiveness Project

The Fundraising Effectiveness Project publishes quarterly and annual reports that examine key fundraising metrics, serving as a benchmark for nonprofit executives, development staff and researchers. The Fundraising Effectiveness Project and the Growth in Giving database are both administered by the Association of Fundraising Professionals in collaboration with GivingTuesday. The Growth in Giving database is the world's largest public record of donation activity, with more than 204 million donation transactions, and is continuously updated by leading fundraising software thought leaders (in alphabetical order) Bloomerang, DonorPerfect, and NeonCRM. Additional partners include the 7th Day Adventists, The Biedermann Group, DataLake Nonprofit Research, and DonorTrends (a division of EveryAction). For more information and how you or your fundraising software provider can participate, please visit www.afpfep.org.

#### Methodology

We removed organizations that did not have a minimum of 25 donors and \$5,000 in revenue in each of the previous five years. We removed the fringe organizations at either tail of the growth curve for donors and dollars. If 2019 revenue growth was more than 300% or less than - 75% or 2019 donor growth was more than 275% and less than -70% organizations were removed. From this now available universe of organizations we randomly sampled organizations from each of the four organization sizes based on 2019 annual revenue. A) \$100,001 - \$250,000; B) \$250,001 - \$1,000,000; C) \$1,000,001 - \$5,000,000; and D) \$5,000,001 - \$10,000,000 so that we achieved a balanced stratification that was reflective of the IRS filers. We left a minimum of 10% of organizations within these ranges to be used for replacements in the event that any organizations leave the data pool. The final number of organizations this report is now based on is 2,496 and that represents 1.65% of the organizations at large in this size range.

## Significance of Mega Gifts

<b>Giving in Billions</b>	2018		2019		2019		2019		2019		2019		2019		2020	Year over Year	
Total Giving	\$ 427.	71 \$	\$ 449.64	\$	471.44	4.62%											
Individual Giving	\$ 292.	9 9	\$ 309.66	\$	324.10	4.46%											
Mega Gifts	\$ 11.3	21 \$	\$ 10.27	\$	19.49	47.31%											

## Observations

## 2020 Highlights:

- 1. Charitable Giving went UP
  - a) \$17.33 Billion Increase in Giving during the Pandemic
- 2. Increase in Giving is due to
  - a) 15 Gifts of \$100 Million+ totaling \$13.3 Billion
  - b) Gifts of \$1 Million + totaling \$19.4 Billion
- 3. The number of Donors is DOWN
- 4. Donor Advised Funds and Family Foundations are **Key** Sources
- 5. We need better **Stewardship** to Retain and Engage Donors
- 6. The robust Stock Market continues to drive major gifts

### Philanthropic Challenges to Keep in Mind

- The average (non-megagift) individual donor is not participating at the rate as he/she has previously done, nor are these donors being retained as they once were.
- This results in a larger dependance on megagifts to drive overall philanthropy.
- While the rise in giving to family foundations and donor advised funds is welcome it comes with its own issues as gifts to those entities are not being directly transferred to nonprofit organizations.
- Family Foundations act as endowments, when a donor contributes \$10M to a family foundation the full \$10M is added to the Giving USA philanthropic total. However, on average only \$500,000 (5%) of the \$10,000,000 will be allocated to nonprofit organizations on an annual basis.
- Over the last five years this giving to Family Foundations and DAF's has resulted in \$300B not being allocated directly to nonprofit organizations.
